

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

# SCIENCE

A Weekly Journal devoted to the Advancement of Science, publishing the official notices and proceedings of the American Association for the Advancement of Science, edited by J. McKeen Cattell and published every Friday by

## THE SCIENCE PRESS

11 Liberty St., Utica, N. Y.      Garrison, N. Y.  
New York City: Grand Central Terminal

Annual Subscription, \$6.00      Single Copies, 15 Cts.

Entered as second-class matter January 21, 1922, at the Post Office at Utica, N. Y., Under the Act of March 3, 1879.

VOL. LVI      OCTOBER 6, 1922      No. 1449

## CONTENTS

<i>The British Association for the Advancement of Science:</i>	
<i>The Organization of Research:</i> PROFESSOR J. C. IRVINE.....	373
<i>The United States Fundamental Standards of Length and Mass:</i> DR. T. C. MENDENHALL .....	377
<i>Scientific Events:</i>	
<i>The Herschel Centenary; American Ornithologists' Union; Public Lectures at the California Academy of Sciences; The Silliman Lectures of Yale University; Appointments at the Massachusetts Institute of Technology</i> .....	381
<i>Scientific Notes and News</i> .....	383
<i>University and Educational Notes</i> .....	387
<i>Discussion and Correspondence:</i>	
<i>The Death Rate from Tuberculosis:</i> DR. A. C. ABBOTT. <i>Old Glaciation in the Cordilleran Region:</i> DR. FRANK LEVERETT. <i>Some Similarities between the Geology of California and Parts of the Dutch East Indies:</i> PROFESSOR H. A. BROUWER. <i>Relief for Russian Scientific Men:</i> ISADORE LEVITT .....	387
<i>Quotations:</i>	
<i>The British Association</i> .....	390
<i>Scientific Books:</i>	
<i>Haldane on Respiration:</i> PROFESSOR YANDELL HENDERSON.....	390
<i>Special Articles:</i>	
<i>Duplicate Genes in Crepis; Inheritance of Glandular Pubescence in Crepis:</i> PROFESSOR E. B. BABCOCK and J. L. COLLINS..	392
<i>The American Chemical Society:</i> DR. CHARLES L. PARSONS.....	393

## THE ORGANIZATION OF RESEARCH<sup>1</sup>

THE principles of science are to-day widely spread; systematic scientific training has found an honorable place in the schools and in the colleges; above all, there is the realization that much of human progress is based on scientific inquiry, and at last this is fostered and, in part, financed as a definite unit of national educational policy. Public funds are devoted to provide facilities for those who are competent to pursue scientific investigations, and in this way the state, acting through the Department of Scientific and Industrial Research, has assumed the double responsibility of providing for the advancement of knowledge and for the application of scientific methods to industry. Scientific workers have been given the opportunities they desired, and it remains for us to justify all that has been done. We have to-day glanced briefly at the painful toil and long years of preparation; now it falls to us to sow the first crop and reap the first harvest.

Thanks to the wisdom and foresight of others, it has been possible to frame the government policy in the light of the experience gained with pre-existing research organizations. The pioneer scheme of the kind is that administered by the commissioners of the 1851 Exhibition, who since 1890 have awarded research scholarships to selected graduates. When in 1901 Mr. Carnegie's benefaction was applied to the Scottish universities the trustees wisely determined to devote part of the revenues to the provision of research awards which take the form of scholarships, fellowships and research lectureships. These have proved an immense boon to Scottish graduates, and the success of the venture is sufficiently testified by
